Application

- SNOWA F200 is an EPS class with NON-HBCD flame retardant agent, which can be used in production of EPS foam in density ranges between 10-18 kg/ m3 which is suitable for high quality block molding and thick wall shape molding.

- SNOWA F200 in general is used in thermal insulation material for construction applications and for construction contour moldings which is requiring fire classification.

- Lower densities can be achieved by multiple expansions.

Bead size - Diameter	0.9 - 1.3 mm
Blowing agent - Pentane	5.6 - 7 %
Residual Styrene Monomer	Less than 1000 ppm
Moisture content	Less than %1
CFC content	Nil
Flammability	DIN 4102 B2, EN ISO 11925-2/ EN 13 501 E
Density	10 - 18 Kg/m
