Application

- SNOWA F400 is an EPS class with NON-HBCD flame retardant agent, which can be used in production of EPS foam in density ranges above 20 kg/m3 which is suitable for high quality block molding and for shape molding with good fusion and surface finish.

- SNOWA F400 in general is used for packaging and insulation application which is requiring fire classification.

- Lower densities can be achieved by multiple expansions.

Bead size - Diameter	0.4 - 0.7 mm
Blowing agent - Pentane	5.6 - 7 %
Residual Styrene Monomer	Less than 1000 ppm
Moisture content	Less than 1 %
CFC content: Nil	Nill
Flammability	DIN 4102 B2, EN ISO 11925-2/ EN 13 501 E
Density	Above 20 Kg/m3
